## Ovato (OVO) Lists on WhiteBIT Exchange

### Ovato announces trading on its first exchange, WhiteBIT, along with additional exchanges.

Singapore, November 16, 2020 – Ovato Digital Cash (Symbol: OVO), a new digital currency and next generation of Litecoin, announced today that its coin will be traded on the WhiteBIT exchange. A top 10% exchange launched in December of 2018, WhiteBIT typically trades \$300 million USD per day from over 150,000 users across Europe, Asia, and South America. Plans call for three additional exchanges to come online by the end of 2020.

Trading will commence within 3 days and will be exclusive to WhiteBIT established clients (or on a “trading by appointment” basis for current Ovato stakeholders) for the first 30 days. Pricing will be reflective in Ovato wallets on a 15-minute delay basis. This marks Ovato’s initial listing, with additional exchanges coming online over the next 75 days.

Ovato is designed from the ground up, for everyday life. Ovato is developed especially for shoppers, merchants, and peer-to-peer transactions, implementing a full-circle ecosystem approach. Through its strategic partners, such as Bitovation and Owards, Ovato is creating an economy for both the supply and demand side of its currency. Bitovation is launching the Ovato pilot program later this month, in South Florida, while integrating into the rewards platform, Owards.

### About WhiteBIT

WhiteBIT is a European centralized exchange that offers crypto-to-crypto and crypto-to-fiat transactions with 0.1% trading fees and it remains one of the few exchanges offering margin trading. With European Exchange and Custody licenses, WhiteBIT meets KYC and AML requirements. WhiteBIT offers instant transactions with P2P codes, the possibility of staking, private and public API integration, and a number of trading tools, including limit, market, stop limit, and stop market orders.

### About Bitovation

Bitovation helps businesses create value-added ecosystems, ones that empower and reward both merchants and users by utilizing mobile keywords, text marketing, digital coupons, contests, digital currency payments, and social influencer incentives. Bitovation reduces costs and inefficiencies for merchants, while providing the ability to increase their revenue.

## About Ovato

Based in Singapore, Ovato is managed and operated by the architects and engineers at Ovato, Pte. Ltd.. Ovato Digital Cash is the next generation of Litecoin, built on its own protocol, created for everyone from users to merchants. Ovato has developed a suite of products to assist in the buildout of its economy, including:

App Wallets: iOS and Android Web  
Wallets  
Text Wallet Merchant  
Wallet Mining  
Platform Faucet  
Explorer

Ovato is creating a robust utility case for its currency. Ovato is providing users a better way to exchange value in low-fee micro transactions, large business transactions, and permissionless spending on the blockchain. Ovato has built a digital currency that will enable users to transact in seconds and be confirmed in minutes; a reliable network that will run without congestion, allowing users to send globally, quickly and for pennies. It's simple and easy to use, providing a stable payment system to store value using state of the art, secure blockchain technology.

Ovato has facilitated the partnering of the Ovato coin using a suite of strategic distribution partners, covering all forms of digital commerce prevalent in today's centralized financial society, to ensure the mass adoption of the coin, including the following:

Rewards and Rebates  
Social Influencing  
Gaming  
Auctions  
Travel
